Contract Type	
Contract Expiration Date	
Host Platform	Second Front System's Game Warden
Authorizing Official	Mr. Brian Kropa, AFLCMC/EN-EZ
Information System Owner	AFWERX/AFRL ISO

1. The purpose of this memorandum is to designate the roles and responsibilities associated with hosting the **PRODUCT COMPANY, APPLICATION NAME** on Second Front System's Game Warden accredited Platform as a Service (PaaS) with **MISSION OWNER ORGANIZATION** as the government agency mission owner.
2. The **PRODUCT COMPANY**, will be responsible for their application's cybersecurity compliance within the Game Warden Platform as a Service and must generate, maintain, and update all Body of Evidence (BoE) artifacts as required by the authorizing official or their designee
3. The Host Platform, Second Front's Game Warden PaaS, will be responsible for maintaining their Authority to Operate (ATO) in alignment with those needed by the **APPLICATION NAME** application.
4. The Mission Owner and Sponsor, **MISSION OWNER ORGANIZATION**, will be responsible for ensuring that funding, sustaining, endorsing, and sponsoring the authorization package for the **APPLICATION NAME** application are accomplished and tracked. **MISSION OWNER ORGANIZATION** is also responsible for ensuring that an in-depth cybersecurity assessment in accordance with DoD policy must be conducted by a DoD AO prior to **APPLICATION NAME** application being deployed onto a DoD network. After deployment onto the DoD network, the mission owner and sponsor will ensure the **PRODUCT COMPANY** remains in compliance set forth by the Authorizing Official.
5. The **AUTHORIZING OFFICIAL** will be responsible for evaluating and accepting the risks associated with the application and will be the final determining authority toward its accreditation, Certificate to Field, or ATO. The AO will periodically re-assess the authorized baseline, based on changes to the required compliance standards and significant changes in risk levels found in continuous monitoring.
6. The **INFORMATION SYSTEM OWNER** will be responsible for the overall procurement, development, integration, modification, and operation and maintenance of the Game Warden Platform as a Service. Will interface with delegated points of contact to consolidate inputs to the Authorizing Official.
